Part of Paper No./Mail Date 20051028

The information disclosure statement filed October 21, 2005 partially fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each and every cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

The supplied copies of Japanese references 10-075164 and 10-023743 were incomplete since they did not include any figures except that on the front page even though the references clearly set forth nine figures in the case of 10-075164 and six figures in the case of 10-023743.

Additionally, it is noted that Japanese patent 2001-352748 was already indicated as considered on the July 8, 2005 IDS (see provided copy). Regardless of how many varied translations of the reference are then provided, which have been received and considered, the reference itself has been considered and remains considered. The translation of the Japanese patent application has also been received and considered but must be lined through since otherwise it will be printed as a reference on the front page of the patent issuing from this application that is not readily accessible to the general public.

Further, it is noted that US patents 5,10,261 and 5,687,067, Japanese patent 08-182305, and the Scott Deury reference were all already indicated as considered on the February 10, 2005 IDS (see provided copy).

### REASONS FOR ALLOWANCE

The claimed invention of a DC/DC converter is found to be allowable over the prior art since a DC/DC converter comprising switching means selectively controlled by one of at least three different discrete control voltages was not found to be singularly or collectively taught by the prior art. Additionally the claimed invention of a DC/DC converter is found to be allowable over the recently cited Japanese prior art, Japan 5-68130, since the Japanese prior art concerns generic gating of a GTO thyristor and no motivation is found either singularly or collectively in the prior art as a whole to utilize the GTO gating circuit as the gate drive circuit for a switching element of a DC/DC converter.

Any comments considered necessary by applicant must be submitted no later than the payment of the Issue Fee and, to avoid processing delays, should preferably accompany the Issue Fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeffrey L. Sterrett whose telephone number is (571) 272-2085. The examiner can normally be reached on Monday-Thursday & 8:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Sherry can be reached on (571) 272-2084. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
